This work is copyright. Apart from any use permitted in accordance with the Berne Convention for the Protection of Literary and Artistic Works (1886), and except in the circumstances described below, no part may be translated, reproduced by any process, adapted, communicated or commercially exploited without prior written permission from the International Hydrographic Organization Secretariat (IHO Secretariat). Copyright in some of the material in this publication may be owned by another party and permission for the translation and/or reproduction of that material must be obtained from the owner.

This document or partial material from this document may be translated, reproduced or distributed for general information, on no more than a cost recovery basis. Copies may not be sold or distributed for profit or gain without prior written agreement of the IHO Secretariat acting for the IHO and any other copyright holders.

In the event that this document or partial material from this document is reproduced, translated or distributed under the terms described above, the following statements are to be included:

“Material from IHO publication [reference to extract: Title, Edition] is reproduced with the permission of the International Hydrographic Bureau (IHB) (Permission No/...) acting for the International Hydrographic Organization Secretariat (IHO Secretariat), which does not accept responsibility for the correctness of the material as reproduced: in case of doubt, the IHO’s authentic text shall prevail. The incorporation of material sourced from IHO shall not be construed as constituting an endorsement by IHO of this product.”

“This [document/publication] is a translation of IHO [document/publication] [name]. The IHO has not checked this translation and therefore takes no responsibility for its accuracy. In case of doubt the source version of [name] in [language] should be consulted.”

The IHO Logo or other identifiers shall not be used in any derived product without prior written permission from the IHO Secretariat.

element **AbstractRXNType/categoryOfAuthority**

diagram	<p>categoryOfAuthority</p> <p>type categoryOfAuthorityT...</p>
type	categoryOfAuthorityType

facets	Kind	Value	Annotation
	enumeration	customs	documentation The agency or establishment for collecting duties, tolls. (Merriam-Websters online Dictionary 23rd February 2006, amended).
	enumeration	border control	documentation The administration to prevent or detect and prosecute violations of rules and regulations at international boundaries (adapted from Merriam-Websters online Dictionary 23rd February 2006).
	enumeration	police	documentation The department of government, or civil force, charged with maintaining public order. (Adapted from OED)
	enumeration	port	documentation Person or corporation, owners of, or entrusted with or invested with the power of managing a port. May be called a Harbour Board, Port Trust, Port Commission, Harbour Commission, Marine Department (NP 100 8th Edition 14 Oct 2004)
	enumeration	immigration	documentation The authority controlling people entering a country.
	enumeration	health	documentation The authority with responsibility for checking the validity of the health declaration of a vessel and for declaring free pratique.
	enumeration	coast guard	documentation Organisation keeping watch on shipping and coastal waters according to governmental law; normally the authority with responsibility for search and rescue.
	enumeration	agricultural	documentation The authority with responsibility for preventing infection of the agriculture of a country and for the protection of the agricultural interests of a country.
	enumeration	military	documentation A military authority which provides control of access to or approval for transit through designated areas or airspace.
	enumeration	private company	documentation A private or publicly owned company or commercial enterprise which exercises control of facilities, for example a calibration area.
	enumeration	maritime police	documentation A governmental or military force with jurisdiction in territorial waters. Examples could include Gendarmerie Maritime, Carabinerie, and Guardia Civil.
	enumeration	environmental	documentation An authority with responsibility for the protection of the environment.
	enumeration	fishery	documentation An authority with responsibility for the control of fisheries.
	enumeration	finance	documentation an authority with responsibility for the control and movement of money.
	enumeration	maritime	documentation A national or regional authority charged with administration of maritime affairs.

documentation
A place equipped to transmit radio waves.
documentation
Remarks: Such a station may be either stationary or mobile, and may also be provided with a

	<p>radio receiver. In British terminology, also called 'w/t station'. The transmission of a radio station may serve to provide mariners with a line of position (IHO Chart Specifications, M-4). The object 'radio station' is used to encode the point of transmission of the signal.</p> <p>documentation</p> <p>S-123 remarks: (1) The area in which the radio service can be obtained is described by an RDOSVC object. (2) The S-123 definition differs from the 2016 S-101 definition by omitting the optional attribute communicationChannel (bound to the NPUBs domain complex attribute radioStationCommunicationDescription instead). The NPUBs domain feature also binds attribute orientation to RadioStation.</p>

element **vesselsMeasurementsType/vesselsCharacteristics**

diagram			
type	vesselsCharacteristicsType		
facets	Kind enumeration	Value length overall	Annotation documentation The maximum length of the ship (L.O.A.).

	enumeration	length at waterline	<p>(http://en.wikipedia.org/wiki/Ship_measurements; 24 July 2010)</p> <p>documentation</p> <p>The ship's length measured at the waterline (L.W.L.). (http://en.wikipedia.org/wiki/Ship_measurements; 24 July 2010)</p>
	enumeration	breadth	<p>documentation</p> <p>The width or beam of the vessel. (Adapted from http://en.wikipedia.org/wiki/Ship_measurements; 24 July 2010)</p>
	enumeration	draught	<p>documentation</p> <p>The depth of water necessary to float a vessel fully loaded. (http://en.wikipedia.org/wiki/Ship_measurements; 24 July 2010)</p>
	enumeration	height	<p>documentation</p> <p>The height of the highest point of a vessel's structure (e.g. radar aerial, funnel, cranes, masthead) above her waterline.(UKHO NP100/2009)</p>
	enumeration	displacement tonnage	<p>documentation</p> <p>A measurement of the weight of the vessel, usually used for warships. (Merchant ships are usually measured based on the volume of cargo space; see tonnage). Displacement is expressed either in long tons of 2,240 pounds or metric tonnes of 1,000 kg. Since the two units are very close in size (2,240 pounds = 1,016 kg and 1,000 kg = 2,205 pounds), it is common not to distinguish between them. To preserve secrecy, nations sometimes misstate a warship's displacement. (http://en.wikipedia.org/wiki/Ship_measurements; 24 July 2010)</p>
	enumeration	displacement tonnage, light	<p>documentation</p> <p>The weight of the ship excluding cargo, fuel, ballast, stores, passengers, and crew, but with water in the boilers to steaming level. (http://en.wikipedia.org/wiki/Ship_measurements; 24 July 2010)</p>
	enumeration	displacement tonnage, loaded	<p>documentation</p> <p>The weight of the ship including cargo, passengers, fuel, water, stores, dunnage and such other items necessary for use on a voyage, which brings the vessel down to her load draft. (http://en.wikipedia.org/wiki/Ship_measurements; 24 July 2010)</p>
	enumeration	deadweight tonnage	<p>documentation</p> <p>The difference between displacement, light and displacement, loaded. A measure of the ship's total carrying capacity. (http://en.wikipedia.org/wiki/Ship_measurements; 24 July 2010)</p>
	enumeration	gross tonnage	<p>documentation</p> <p>The entire internal cubic capacity of the ship expressed in tons of 100 cubic feet to the ton, except certain spaces with are exempted such as: peak and other tanks for water ballast, open forecastle bridge and poop, access of hatchways, certain light and air spaces, domes of skylights, condenser, anchor gear, steering gear, wheel house, galley and cabin for passengers. (http://en.wikipedia.org/wiki/Ship_measurements; 24 July 2010)</p>

	enumeration	net tonnage	2010) documentation Obtained from the gross tonnage by deducting crew and navigating spaces and allowances for propulsion machinery.(http://en.wikipedia.org/wiki/Ship_measurements ; 24 July 2010)
	enumeration	Panama Canal/Universal Measurement System net tonnage	documentation the Panama Canal/Universal Measurement System (PC/UMS) is based on net tonnage, modified for Panama Canal purposes. PC/UMS is based on a mathematical formula to calculate a vessel's total volume; a PC/UMS net ton is equivalent to 100 cubic feet of capacity. (Adapted from http://en.wikipedia.org/wiki/Tonnage 4 Oct 2010)
	enumeration	Suez Canal net tonnage	documentation the Suez Canal Net Tonnage (SCNT) is derived with a number of modifications from the former net register tonnage of the Moorsom System and was established by the International Commission of Constantinople in its Protocol of 18 December 1873. It is still in use, as amended by the Rules of Navigation of the Suez Canal Authority, and is registered in the Suez Canal Tonnage Certificate. (Adapted from http://en.wikipedia.org/wiki/Tonnage 4 Oct 2010)
	enumeration	Suez Canal gross tonnage	documentation Suez Canal Gross Tonnage (SCGT) is derived with a number of modifications from the former net register tonnage of the Moorsom System and was established by the International Commission of Constantinople in its Protocol of 18 December 1873. It is still in use, as amended by the Rules of Navigation of the Suez Canal Authority, and is registered in the Suez Canal Tonnage Certificate.

	enumeration	Low Frequency (LF) voice traffic	documentation Frequency in a frequency range between 30 and 300 kHz used for voice traffic
	enumeration	Medium Frequency (MF) voice traffic	documentation Frequency in a frequency range between 300 and 3 000kHz used for voice traffic
	enumeration	High Frequency (HF) voice traffic	documentation Frequency in a frequency range between 3 and 30 MHz used for voice traffic
	enumeration	Very High Frequency (VHF)	documentation Frequency in a frequency range between 30 and 300

	enumeration	voice traffic	MHz used for voice traffic
	enumeration	High Frequency Narrow Band Direct Printing	documentation High Frequency Narrow Band Direct Printing
	enumeration	NAVTEX	documentation Narrow-band direct-printing telegraphy system for transmission of maritime safety information.
	enumeration	SafetyNET	documentation SafetyNET is an international automatic direct-printing satellite-based service for the promulgation of navigational and meteorological warnings, meteorological forecasts and other urgent safety-related messages - maritime safety information (MSI) - to ships.
	enumeration	NBDP Telegraphy	documentation Narrow Band Direct Printing Telegraphy. A communications system consisting of teletypewriters connected to a telephonic network to send and receive wireless signals.
	enumeration	facsimile	documentation A method or device for transmitting documents, drawings, photographs, or the like, by means of radio or telephone for exact reproduction elsewhere.
	enumeration	NAVIP	documentation A Russian system transmitting navigational information, send by radio and containing information relevant to coastal waters of foreign countries and high seas.
	enumeration	Low Frequency (LF) digital traffic	documentation Frequency in a frequency range between 30 and 300 kHz used for digital traffic
	enumeration	Medium Frequency (MF) digital traffic	documentation Frequency in a frequency range between 300 and 3000kHz used for digital traffic
	enumeration	High Frequency (HF) digital traffic	documentation Frequency in a frequency range between 3 and 30 MHz used for digital traffic
	enumeration	Very High Frequency (VHF) digital traffic	documentation Frequency in a frequency range between 30 and 300 MHz used for digital traffic
	enumeration	Low Frequency (LF) telegraph traffic	documentation Frequency in a frequency range between 30 and 300 kHz used for telegraph traffic
	enumeration	Medium Frequency (MF) telegraph traffic	documentation Frequency in a frequency range between 300 and 3 000kHz used for telegraph traffic
	enumeration	High Frequency (HF) telegraph traffic	documentation Frequency in a frequency range between 3 and 30 MHz used for telegraph traffic
	enumeration	Medium Frequency (MF) Digital Selective Call traffic	documentation Frequency in a frequency range between 300 and 3000kHz used for Digital Selective Call traffic
	enumeration	High Frequency (HF) Digital Selective Call traffic	documentation Frequency in a frequency range between 3 and 30 MHz used for Digital Selective Call traffic
	enumeration	Very High	documentation

	Frequency (VHF) Digital Selective Call traffic	Frequency in a frequency range between 30 and 300 MHz used for Digital Selective Call traffic
annotation	documentation Categories of radiocommunications based on frequency band and radio traffic method.	

simpleType **categoryOfRadioStationType**

type	restriction of xs:string		
facets	Kind	Value	Annotation
	enumeration	radio direction-finding station	documentation A radio station intended only to determine the direction of other stations by means of transmission from the latter.
	enumeration	Decca	documentation The Decca Navigator System is a high-accuracy, short to medium range radio navigation aid intended for coastal and landfall navigation.
	enumeration	Loran C	documentation A low frequency electronic position fixing system using pulsed transmissions at 100 Khz.
	enumeration	Differential GNSS	documentation A radiobeacon transmitting DGPS correction signals.
	enumeration	Toran	documentation An electronic position fixing system used mainly by aircraft.
	enumeration	Omega	documentation A long-range radio navigational aid which operates within the VLF frequency band. The system comprises eight land based stations.
	enumeration	Syledis	documentation A ranging position fixing system operating at 420-450MHz over a range of up to 400 Km.
	enumeration	Chaika	documentation A low frequency electronic position fixing system using pulsed transmissions at 100 Khz.
	enumeration	facsimile transmission	documentation facsimile transmission (IHO HYDRO register, 2010-11-14)
	enumeration	radio telephone station	documentation The equipment needed at one station to carry on two way voice communication by radio waves only.
	enumeration	AIS base station	documentation Remark: Not defined in GI Registry (2017-04-20).
annotation	documentation Classification of radio services offered by a radio station.

simpleType **QUAPOSType**

type	restriction of xs:string		
facets	Kind enumeration	Value surveyed	Annotation documentation The position(s) was(were) determined by the operation of making measurements for determining the relative position of points on, above, or beneath the earth's surface. Survey implies a regular, controlled, survey of any date.
	enumeration	unsurveyed	documentation Survey data does not exist or is very poor
	enumeration	inadequately surveyed	documentation Position data is of very poor quality
	enumeration	approximate	documentation A position that is considered to be less than third-order accuracy, but is generally considered to be within 30.5 meters of its correct geographic location. Also, may apply to a feature whose position does not remain fixed.
	enumeration	position doubtful	documentation A feature whose position has been reported but which is considered to be doubtful
	enumeration	unreliable	documentation A feature's position obtained from questionable or unreliable data.
	enumeration	reported (not surveyed)	documentation A feature whose position has been reported and its position confirmed by some means other than a formal survey such as an independent report of the same feature.
	enumeration	reported (not confirmed)	documentation A feature whose position has been reported and its position has not been confirmed.
	enumeration	estimated	documentation The most probable position of a feature determined from incomplete data or data of questionable accuracy.
	enumeration	precisely known	documentation A position that is of a known value, such as the position of an anchor berth or other defined feature.
	enumeration	calculated	documentation A position that is computed from data.
annotation	documentation Definition required		

simpleType **sourceTypeType**

type	restriction of xs:string		
facets	Kind enumeration	Value law or regulation	Annotation documentation treaty, convention, or international agreement; law or regulation issued by a national or other authority

	enumeration	official publication	documentation publication not having the force of law, issued by an international organisation or a national or local administration
	enumeration	mariner report, confirmed	documentation Reported by mariner(s) and confirmed by another source
	enumeration	mariner report, not confirmed	documentation reported by mariner(s) but not confirmed
	enumeration	industry publications and reports	documentation shipping and other industry publication, including graphics, charts and web sites
	enumeration	remotely sensed images	documentation information obtained from satellite images
	enumeration	photographs	documentation information obtained from photographs
	enumeration	products issued by HO services	documentation information obtained from products issued by Hydrographic Offices
	enumeration	news media	documentation information obtained from news media
	enumeration	traffic data	documentation information obtained from the analysis of traffic data

simpleType **statusType**

type	restriction of xs:string		
facets	Kind	Value	Annotation
	enumeration	permanent	documentation Intended to last or function indefinitely
	enumeration	occasional	documentation Acting on special occasions; happening irregularly
	enumeration	recommended	documentation Presented as worthy of confidence, acceptance, use, etc.
	enumeration	not in use	documentation Use has ceased, but the facility still exists intact; disused.
	enumeration	periodic/intermittent	documentation Recurring at intervals
	enumeration	reserved	documentation Set apart for some specific use
	enumeration	temporary	documentation Meant to last only for a time
	enumeration	private	documentation Administered by an individual or corporation, rather than a State or a public body.
	enumeration	mandatory	documentation Compulsory; enforced.
	enumeration	extinguished	documentation No longer lit
	enumeration	illuminated	documentation Lit by floodlights, strip lights, etc.
	enumeration	historic	documentation Famous in history; of historical interest

	enumeration	public	documentation Belonging to, available to, used or shared by, the community as a whole and not restricted to private use.
	enumeration	synchronised	documentation Occur at a time, coincide in point of time, be contemporary or simultaneous
	enumeration	watched	documentation Looked at or observed over a period of time especially so as to be aware of any movement or change.
	enumeration	un-watched	documentation Usually automatic in operation, without any permanently-stationed personnel to superintend it.
	enumeration	existence doubtful	documentation A feature that has been reported but has not been definitely determined to exist.
	enumeration	buoyed	documentation Marked by buoys
annotation	documentation Definition required		

simpleType **telecommunicationServiceType**

type	union of (restriction of xs:string , restriction of xs:string)

simpleType **vesselsCharacteristicsType**

type	restriction of xs:string		
facets	Kind	Value	Annotation
	enumeration	length overall	documentation The maximum length of the ship (L.O.A.). (http://en.wikipedia.org/wiki/Ship_measurements ; 24 July 2010)
	enumeration	length at waterline	documentation The ship's length measured at the waterline (L.W.L.). (http://en.wikipedia.org/wiki/Ship_measurements ; 24 July 2010)
	enumeration	breadth	documentation The width or beam of the vessel. (Adapted from http://en.wikipedia.org/wiki/Ship_measurements ; 24 July 2010)
	enumeration	draught	documentation The depth of water necessary to float a vessel fully loaded.

	enumeration	height	<p>(http://en.wikipedia.org/wiki/Ship_measurements; 24 July 2010)</p> <p>documentation</p> <p>The height of the highest point of a vessel's structure (e.g. radar aerial, funnel, cranes, masthead) above her waterline.(UKHO NP100/2009)</p>
	enumeration	displacement tonnage	<p>documentation</p> <p>A measurement of the weight of the vessel, usually used for warships. (Merchant ships are usually measured based on the volume of cargo space; see tonnage). Displacement is expressed either in long tons of 2,240 pounds or metric tonnes of 1,000 kg. Since the two units are very close in size (2,240 pounds = 1,016 kg and 1,000 kg = 2,205 pounds), it is common not to distinguish between them. To preserve secrecy, nations sometimes misstate a warship's displacement.</p> <p>(http://en.wikipedia.org/wiki/Ship_measurements; 24 July 2010)</p>
	enumeration	displacement tonnage, light	<p>documentation</p> <p>The weight of the ship excluding cargo, fuel, ballast, stores, passengers, and crew, but with water in the boilers to steaming level.</p> <p>(http://en.wikipedia.org/wiki/Ship_measurements; 24 July 2010)</p>
	enumeration	displacement tonnage, loaded	<p>documentation</p> <p>The weight of the ship including cargo, passengers, fuel, water, stores, dunnage and such other items necessary for use on a voyage, which brings the vessel down to her load draft. (http://en.wikipedia.org/wiki/Ship_measurements; 24 July 2010)</p>
	enumeration	deadweight tonnage	<p>documentation</p> <p>The difference between displacement, light and displacement, loaded. A measure of the ship's total carrying capacity. (http://en.wikipedia.org/wiki/Ship_measurements; 24 July 2010)</p>
	enumeration	gross tonnage	<p>documentation</p> <p>The entire internal cubic capacity of the ship expressed in tons of 100 cubic feet to the ton, except certain spaces with are exempted such as: peak and other tanks for water ballast, open forecastle bridge and poop, access of hatchways, certain light and air spaces, domes of skylights, condenser, anchor gear, steering gear, wheel house, galley and cabin for passengers.</p> <p>(http://en.wikipedia.org/wiki/Ship_measurements; 24 July 2010)</p>
	enumeration	net tonnage	<p>documentation</p> <p>Obtained from the gross tonnage by deducting crew and navigating spaces and allowances for propulsion machinery.(http://en.wikipedia.org/wiki/Ship_measurements; 24 July 2010)</p>
	enumeration	Panama Canal/Universal Measurement System net tonnage	<p>documentation</p> <p>the Panama Canal/Universal Measurement System (PC/UMS) is based on net tonnage, modified for Panama Canal purposes. PC/UMS is based on a mathematical formula to calculate a vessel's total volume; a PC/UMS net ton is equivalent to 100 cubic feet of capacity.</p>

	enumeration	Suez Canal net tonnage	(Adapted from http://en.wikipedia.org/wiki/Tonnage 4 Oct 2010) documentation the Suez Canal Net Tonnage (SCNT) is derived with a number of modifications from the former net register tonnage of the Moorsom System and was established by the International Commission of Constantinople in its Protocol of 18 December 1873. It is still in use, as amended by the Rules of Navigation of the Suez Canal Authority, and is registered in the Suez Canal Tonnage Certificate.
	enumeration	Suez Canal gross tonnage	(Adapted from http://en.wikipedia.org/wiki/Tonnage 4 Oct 2010) documentation Suez Canal Gross Tonnage (SCGT) is derived with a number of modifications from the former net register tonnage of the Moorsom System and was established by the International Commission of Constantinople in its Protocol of 18 December 1873. It is still in use, as amended by the Rules of Navigation of the Suez Canal Authority, and is registered in the Suez Canal Tonnage Certificate.

simpleType **vesselsCharacteristicsUnitType**

type	restriction of xs:string		
facets	Kind	Value	Annotation
	enumeration	metre	documentation The metre (or meter) is the base unit of length in the International System of Units (SI). It is defined as the distance travelled by light in vacuum in 1/299,792,458 of a second.
	enumeration	foot	documentation A foot (plural: feet) is a non-SI unit of length in a number of different systems including English units, Imperial units, and United States customary units. The most commonly used foot today is the international foot. There are three feet in a yard and 12 inches in a foot.
	enumeration	metric ton	documentation The tonne or metric ton (U.S.), often redundantly referred to as a metric tonne, is a unit of mass equal to 1,000 kg (2,205 lb) or approximately the mass of one cubic metre of water at four degrees Celsius. It is sometimes abbreviated as mt in the United States, but this conflicts with other SI symbols. The tonne is not a unit in the International System of Units (SI), but is accepted for use with the SI. In SI units and prefixes, the tonne is a megagram (Mg). The Imperial and US customary units comparable to the tonne are both spelled ton in English, though they differ in mass. Pronunciation of tonne (the word used in the UK) and ton is usually identical, but is not too confusing unless accuracy is important as the tonne and UK long ton differ by only 1.6%.
	enumeration	ton	documentation Long ton (weight ton or imperial ton) is the name for the unit called the "ton" in the avoirdupois or Imperial

	enumeration	Suez Canal Net Tonnage	<p>volume; a PC/UMS net ton is equivalent to 100 cubic feet of capacity.</p> <p>documentation</p> <p>The Suez Canal Net Tonnage (SCNT) is derived with a number of modifications from the former net register tonnage of the Moorsom System and was established by the International Commission of Constantinople in its Protocol of 18 December 1873. It is still in use, as amended by the Rules of Navigation of the Suez Canal Authority, and is registered in the Suez Canal Tonnage Certificate.</p>
	enumeration	none	<p>documentation</p> <p>Can be used for net and gross tonnages, including Panama Canal/Universal Measurement System net tonnage and The Suez Canal Net Tonnage.</p>
	enumeration	cubic metres	<p>documentation</p> <p>cubic metres</p>
	enumeration	Suez Canal Gross Tonnage	<p>documentation</p> <p>The Suez Canal Gross Tonnage (SCGT) is derived with a number of modifications from the former net register tonnage of the Moorsom System and was established by the International Commission of Constantinople in its Protocol of 18 December 1873. It is still in use, as amended by the Rules of Navigation of the Suez Canal Authority, and is registered in the Suez Canal Tonnage Certificate.</p>
